Infrastructure Capital S&P 500 Option Income UCITS ETF (the Fund) – Distributing ETF Share Class

ISIN: IE000SKTEI24

A sub-fund of HANetf II ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund aims to generate a high level of current income, distributed on a monthly basis, while also seeking capital appreciation.

In order to achieve its investment objective, the Fund will invest in a manner consistent with the UCITS Regulations and Central Bank requirements, in a portfolio of equity securities and option contracts with economic characteristics similar to such investments held in the S&P 500 Index (the Index or S&P 500 Companies).

The Fund will not seek to track or replicate the Index. The Index will not constrain the management of the Fund in any way and the Fund may invest in securities that are not included in the Index, provided such investments are consistent with the Fund's investment objective and policy.

To assist the Investment Manager's portfolio management process, the Investment Manager may purchase and write put and call options in an effort to (i) generate additional income and reduce volatility in the portfolio, (ii) remove or add securities from the portfolio (i.e., convertible securities), (iii) facilitate total return opportunities, and (iv) hedge against market risks or other risks in the Fund's portfolio. Under normal conditions, the Fund will invest at least 80% of its net assets in equity securities and

option contracts that provide exposure to S&P 500 Companies or to the economic characteristics of the Index.

Investment Policy The Fund employs an active management investment approach in order to achieve its investment objective.

Dealing: Shares of the Fund (**Shares**) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income generated by the Fund's investments will be distributed monthly in respect of the Shares of this class.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar. For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund (the "**Supplement**").

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The categorisation above (5) is due to the nature of the Fund's investments and risk associated with those investments, including:

- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- Active Management Risk:** The Sub-Fund's assets will be actively managed by the Investment Manager who will have discretion (subject to the Sub-Fund's investment restrictions) to invest the Sub-Fund's assets in investments that it considers will enable the Sub-Fund to achieve its investment objective.

There is no guarantee that the Sub-Fund's investment objective will be achieved based on the investments selected.

- Covered Call Option Strategy Risk:** While the Sub-Fund uses a covered call option strategy which is intended to provide income, there is no guarantee that the derivative strategy will achieve this. The Sub-Fund may forego some capital appreciation potential, while retaining the risk of loss should the price of the underlying securities decline. Selling call options will create exposure for the Sub-Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss. The maximum loss for the seller of a call option is potentially unlimited if the option seller does not hold the underlying securities which underlies the options.
- Option Strategy and Basis Risk:** As described under Covered Call Option Strategy Risk, the Sub-Fund may write call options as part of its option income strategy, including call options on an index or on securities where the option position is not directly offset by an exact corresponding holding of the relevant underlying security. While the Sub-Fund seeks to manage such exposure on a portfolio basis in accordance with its risk management process, there can be no assurance that

the performance of the securities held by the Sub-Fund will fully correlate with the performance of the options written. In such circumstances, the Sub-Fund may be exposed to basis risk, whereby movements in the value of the options written are not fully offset by movements in the value of the Sub-Fund's holdings, which may result in increased volatility and may adversely affect the Sub-Fund's performance.

Risks not covered by the indicator, but which are materially relevant to the Fund include:

- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
